

Warmbier Test Equipment Clamp Probes Model CL49

Used to take accurate point-to-point resistance measurements on ESD garments.

The CL49 clamp probes are designed to evaluate ESD garments accounting ANSI ESD20.20. The clamp ensure excellent contact during ESD garment tests such as sleeve-to-sleeve continuity measurements. The contact surface is made from rugged stainless steel and include built in banana plug sockets.

Features

- Suitable for ESD Compliance Testing of ESD Garments
- Ensures Excellent Contact During Evaluations of Garments
- Stainless Steel Contact Surface

Applications:

The CL49 Clamp Kit tests ESD garments for compliance and is an integral part of a complete ESD program.

Specifications:

Material: Stainless Steel; Painted Steel
Contact: Banana Jack Sockets

Part Numbers:

7220.CL.49 Clamp Probe, Pair
